- This Study Media product includes the latest official theory test question bank from the DSA for learner Car Drivers and Motorcyclists.
- It allows you to test yourself against the clock by creating tests of randomly selected official questions.
- You can review your performance on each test, as well as analyse which of the question categories is your weakest. You can review the questions and answers in each individual category or create customised tests from specific categories.
- Every answer is explained by expert driving tutors. Also includes bonus Hazard Perception clips and a printable copy of the Highway Code.

Create random or customised tests and sit them against the clock just like the real thing. Go forwards or backwards through the questions and review your progress at any time, including any questions you have flagged.

Get an instant report of your performance at the end of each test. You can also look back on incorrectly answered questions, together with the correct answer and an explanation. Explanation equals understanding.

Ongoing performance is measured in the test reporting section. Analyse your performance in each question category. You can then create custom tests in the categories you are weakest to improve your performance.

Also included is a tutorial for the Hazard Perception section of the test. It features the DSA's introductory video to this section as well as 8 official clips. Each clip plays twice with the hazard highlighted during the 2nd play.

Contents include...

- The official question bank for car drivers & motorcyclists
- Mock test mode to create randomly selected tests
- Customised test mode to allow testing in specific categories
- Revision mode to view all question, answers and explanations in a category
